## Module II: Our Changing Ocean

*Thinking Space: Use this area to write down your thoughts to help you answer questions about today's activity.*

<p>Why was our ocean soaking up less carbon dioxide 150 years ago?</p>	
<p>What is an example of 'regular' carbon dioxide?</p>	
<p>Can you describe the taste of the soda water? Is it bitter?</p>	
<p>Do you know what makes soda water bubbly?</p>	
<p>Why was there more carbon dioxide (soda water) added to our 'Present' ocean than in our 'Past' ocean?</p>

## Module II: Our Changing Ocean

(Page 2)

<p>What has happened over the past 150 years that is releasing so much carbon dioxide into our air?</p>	
<p>Which ocean has more acidity, our 'Past' or 'Present' ocean? Why?</p>
